AirCyber Catalogue: Golden Rules

- **Confidentiality:** only customers have access to the list of their solutions as well as catalog administrator (webmaster from the Biggerband Company and BoostAeroSpace AirCyber Director & PMO). **No access for Solutions provider, they only have access to the solutions they propose.** The entire site has been pentested against malicious trials by certified cyber experts.

- **Trust is given by Industrial Suppliers:** Any cyber solutions can be added by providers but only those who are deployed in the AirCyber community are **"AirCyber Trusted",** using a mandatory "AirCyber community user validation process" hard coded in the website (before at least 1 AirCyber community member indicated that he deployed the solution in his company, the solution will not be "AirCyber Trusted"). External certifications exists (Government…), associated to "External Trust" label.

- **Fully Automatic, minimum control:** The only validation that BoostAeroSpace will perform is to **validate Industrial Suppliers access to the catalog to control that they belong to the Aerospace & Defense industry**, **and that solutions providers really exist**, avoiding also that solution provider would reference their products as "AirCyber Trusted" without a real Aerospace & Defense user validation.

- **About "free" solutions: BoostAeroSpace** will be in charge to **manage the "orphans" solutions**, mainly opensource of freeware products that do not have an existing solution provider.

- **Ratings confidentiality:** for confidentiality purposes, **Solutions providers will not see their solutions ratings until a minimum of 3 customers rated them**, to avoid them to guess which customer has given the rating and contact the customer for such purpose **(as you can choose your company to appear on Solution Provider cockpit)**.

- **Minimum Notifications by email:** most important notifications have been deployed, mainly for user registration but also some news about solutions added to the catalog etc. always looking at giving zero confidential information by email but inviting users to connect to the catalog.

Why do I need to secure my account with 2 factors authentication (password and Smartphone Authenticator App)?
The list of all your solutions deployed is confidential as it could be used in order to know the protection you have deployed as well as vulnerabilities those solutions could add to your systems.
Smartphone-Generated authenticator codes is a two-factor (2FA) or multi-factor authentication (MFA); an additional security layer – helping to address the vulnerabilities of a standard password-only approach.

NOTIFICATION TO INDUSTRIAL SUPPLIERS WITH AN AIRCYBER CATALOG ACCOUNT

ven. 06/12/2019 15:39
aircyber@boostaerospace.com
AirCyber Catalog - A solution provider has indicated you use his solution
À ☐

[THIS IS AN AUTOMATED MESSAGE FROM AIRCYBER CATALOG - PLEASE DO NOT REPLY DIRECTLY TO THIS EMAIL]

Hi ██████████,

The solution provider "████████████" has recently referenced you as a customer and user of his cyber solution "███████████████████ ████████████" .

To confirm the usage of this solution please access the AirCyber Catalog and validate it through the "New proposed solutions to Validate" section; it will automatically be added to your solutions.

Once validated, you will also be able to give it a rating.

Thank you for keeping your solutions list up to date and helping us to enrich the AirCyber catalog with trusted cyber solutionsBest regards,

The BoostAeroSpace Team. - https://aircybercatalog.boostaerospace.com/

NOTIFICATION TO INDUSTRIAL SUPPLIERS THAT DO NOT HAVE AN AIRCYBER CATALOG ACCOUNT YET

Date: lun. 16 dec. 2019 a 16:48
Subject: AirCyber Catalog - A CyberSecurity solution provider has indicated you use his solution.
To: <████████████████████>
[THIS IS AN AUTOMATED MESSAGE FROM AIRCYBER CATALOG - PLEASE DO NOT REPLY DIRECTLY TO THIS EMAIL]

Dear Aerospace Industrial Supplier,
(If you are not an Aerospace & Defense Industrial Supplier please ignore this email, this invitation is only valid for those companies).

AirCyber program was launched by BoostAeroSpace and its Shareholders (Airbus, Dassault Aviation, Safran and Thales) in their efforts to enhance cybersecurity of the Aerospace and Defense Supply Chain using BoostAeroSpace as a central Hub; it aims to propose security solutions for industrials suppliers with a progressive approach.

AirCyber catalog main mission is to put at Aerospace and Defense SupplyChain disposal a central repository of trusted Cybersecurity solutions:
- Adapted to the specific requirements of the Aerospace and Defense SupplyChain
- Offering a means of measuring the deployments of solutions to guarantee the rise in the protection level;
- Constantly updated based on supplier's implementations and enriched feedback to identify the best services and products to implement.

A cyber solution provider "█████████" has recently referenced you as a customer and user of his cyber solution "Test" in the AirCyber Catalog.

To confirm the usage of this solution you will first need to create an account as an industrial supplier:
https://aircybercatalog.boostaerospace.com/home/signup/?
p=MjMzQDc2NmQ4ZTQ1MjJhMWNkNTZIYjZhODVlMDhiODM2MzNi&m=marine.lortie%2Bmarinemarine%40biggerband.com&n=MarineMarine&rn=Marine

Once validated, you will also be able to give it a rating. Your validation is a valuable input for the Aerospace and Defense community.

Thank you for helping us to enrich the AirCyber catalog with trusted cyber solutions.

Best regards,
The BoostAeroSpace Team. - https://aircybercatalog.boostaerospace.com/

When working to strengthen cybersecurity protection, trust matters.

Trusted Cybersecurity solutions

AirCyber catalog presents cybersecurity products and services deployed in the Aerospace and Defense industry. It also offers the opportunity to identify those solutions that have already been deployed by BoostAeroSpace Shareholders and/or AirCyber customers.

AIRCYBER TRUSTED

Cyber solutions currently deployed by BoostAeroSpace shareholders and/or Aerospace & Defense industrial suppliers. Details regarding the number of confirmed deployments within the AirCyber community can be found in each solution profile

EXTERNAL TRUSTED

Certified Cyber solutions

AirCyber Catalogue: Confidentiality reminder

We take confidential information seriously

Please remind that **AirCyber catalog information is confidential** and that you committed to use it for cyber protection purposes of the company you work for only (Catalog General Conditions); **sharing its content is strictly forbidden.**

This means also that in case of 2 individuals of your company would have both access to consumer part (industrial suppliers members of AirCyber community) and to Solutions Provider part, you must apply strict segregation of duties and consider catalog information delivered to AirCyber community user confidential and not to be disclosed to company user identified as Solution Provider. BoostAeroSpace will pay careful attention to companies' users that would be in this configuration and reserve the right to suspend user's access and remove solutions provider's solutions from the catalog in case of suspicion of the non-respect of those confidentiality rules.

If you already use this solution, do not forget to add the solution to your list.

OEMs & Industrial Suppliers' Deployment information

Certifications information

If the Solution is External Trusted, the certification will appear here.

What can you do?

- Of course, you can first edit your company profile and add colleagues in your company to manage the list of your cyber solutions

- When you will add a solution, you will be invited to give the maximum details about it, this will help Industrials Suppliers while choosing the product or service that better respond to their specific needs.

- Remember to keep you solutions and contact information up to date.

- We invite you to send referencing requests to your clients from the Aerospace & Defense industry through the AirCyber catalog platform to make your solutions become "AirCyber Trusted". Remember that only Aerospace & Defense industrial suppliers will have their access to AirCyber catalogue validated

- Referencing your solutions in the AirCyber catalog is free of any charges. However, we invite you to propose special pricing for AirCyber Community members.

Thank you for helping us to enrich the AirCyber catalog with trusted cyber solutions!

Smartphone Authenticator App

Install a mandatory **smartphone one-time password authenticator application**[1], you will use it during the first password creation.

[1] *Download list of recommended One Time Password Generator Applications by BoostAeroSpace (if you don't already installed such App):*

- *Lastpass Authenticator (iPhone, Android)*

- *Microsoft Authenticator (iPhone, Android)*

- *Authy (iPhone, Android)*

- *OneLogin Protect (iPhone, Android)*

- *Google authenticator (iPhone, Android)*

After download of the App, please wait for instructions from the AirCyber Catalog to configure it for the first time (association of the App and the AirCyber Catalog).
