

# AIRCYBER ENCRYPTION PORTAL

The simplest, most effective encryption/decryption solution.

# The benefits

## Immediately available

No software to install or subscription to purchase.

## Easy to use

The solution is browser-based, without any software installation, making all encryption or decryption operations easy.

## No secrets sharing

The sender no longer needs to give additional code / key / certificate to the recipient to open the sent file.

## Document security

Encryption and decryption take place locally: data is never exposed in clear text and cannot be intercepted.

## Service security

Sovereign, industry-standard platform, tried and tested by our major contractors for several years.

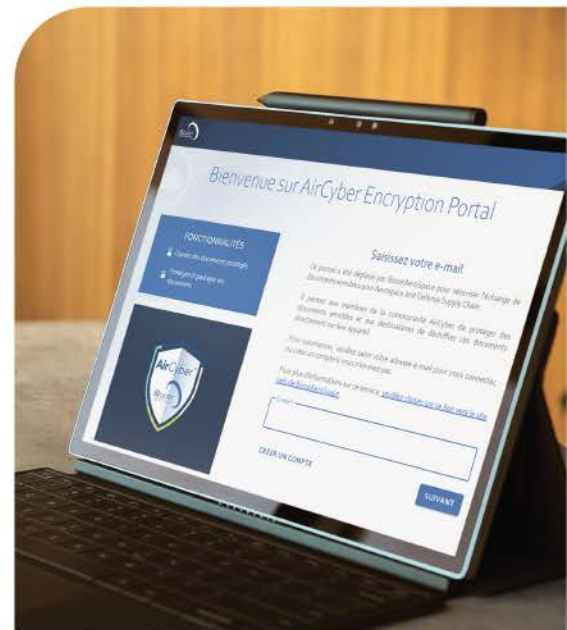

## Usable by all

AirCyber members can encrypt and decrypt documents to any recipient. Non-members can also use the solution without purchasing a license, to share information with members within the industry and potentially beyond.

## At no extra cost

To ensure the security of the entire Aerospace and Defense Chain, BoostAeroSpace covers all costs for its members.

## Try out our encryption portal now.

As a member of the AirCyber Community, you can already use the AirCyber Encryption Portal.
