# Air Connect®

POWERED BY △ Aegys

# BOOST AEROSPACE

AN AIRBUS, DASSAULT AVIATION, SAFRAN, AND THALES COMPANY

## THE SOLUTION FOR AUTOMATIC DATA EXCHANGE BETWEEN SUPPLIERS AND CUSTOMERS

The *AirConnect* solution is an **intuitive** and **ergonomic** dashboard dedicated to the Aerospace and Defense industry's suppliers.

Thanks to the automation of flows between customers' platforms (such as AirSupply) and supplier's ERP, this web application facilitates logistic activities such as order process (PO - Purchase Order) and shipments (Delivery Note and DA – Despatch Advice (aka. ASN - Advanced Shipment Notice)).

It allows the automatic check of POs upon chosen conformity points, forecast analysis as well as invoices' dematerialization.
